**\*\*Please contact Scott Richardson, USFWS (520-670-4643 or [scott\\_richardson@fws.gov](mailto:scott_richardson@fws.gov)), if you have any questions.**

This training seminar is intended for anyone who will be conducting pygmy-owl surveys. We will present information on the basic biology of the pygmy-owl, habitat use, an update of current research, and provide an overview of the current survey protocol and landowner guidance. Additionally, the new data entry system developed in conjunction with AGFD will be presented and explained. This represents new information not presented at previous training seminars so it may be beneficial to attend even if you have attended past training classes.
